

# ALPINE FIELD

**Total Square Footage: 84,944**  
**Capacity: 425**

Take your event to new heights at UCCS

## THE FACTS

### GENERAL

Building a recreational playing field on top of a parking garage is a unique and innovative concept. Alpine Field, an extension of Campus Recreation, is the first project of its kind in the state of Colorado and one of only a handful of similar designs in the United States. It's also the largest flat piece of land on campus that isn't paved or with a building on top of it.

Alpine provides a multipurpose, recreational field with lines to accommodate soccer, rugby, lacrosse and flag football, as well as a venue for drop-in recreation and play. The installed turf also provides a comfortable, safe and durable playing surface that's relatively low-maintenance.

### AMENITIES AND FEATURES

- Equipment available for check-out
- Rooftop spectator area with bleachers
- Plaza area with shade structure and turf lawn hangout area
- Gender-neutral bathrooms
- Office space
- Large equipment storage area
- State-of-the-art lightning detection system
- A commitment to sustainability, with photovoltaic solar panels on the north canopy to help offset the electrical use of the building
